

YATHISH NARAGANAHALLI VEERABHADRAIAH

Software Development Engineer | Security Automation, Cloud Services & Detection Tooling

New York, NY | 347-466-6215 | yn2426@nyu.edu | linkedin.com/in/yathish-n-veerabhadraiah

SUMMARY

Software engineer with a security background who builds and operates services on AWS: REST APIs and backend services (Java Spring Boot, Node.js), an LLM-assisted phishing and spam detection system deployed on AWS, and CI/CD pipelines with automated security checks. Comfortable working across software, cloud infrastructure, and security teams, with hands-on experience in threat detection, vulnerability triage, and automating remediation workflows. M.S. Cybersecurity, NYU (GPA 4.0).

PROFESSIONAL EXPERIENCE

Chief Technology Officer | Plurall AI

Jan 2025 – Apr 2026

- **Built and operated an AWS-hosted AI service** as the sole technical hire, owning backend services, deployment, access control (IAM least-privilege, JWT/OAuth), and production reliability.
- **Developed backend services and REST APIs** in Node.js/Express with PostgreSQL, plus an MCP server connecting LLM components to application logic, tools, and retrieval pipelines.
- **Built Spybot, an LLM-assisted phishing and spam detection system** deployed on AWS, and red-teamed LLM behavior for prompt injection and data leakage before release.

DevSecOps / Security Engineer | Schneider Electric

Aug 2022 – Aug 2024

- **Automated security checks in CI/CD** (GitHub Actions, Jenkins) with SAST/DAST/SCA scanning, credential-leak monitoring, and dependency checks across a development environment used by ~80 engineers.
- **Triaged and drove remediation of vulnerability findings** using Snyk, Wiz, SonarQube, Coverity, and Burp Suite, prioritizing by severity and exploitability and tracking fixes to closure.
- **Administered Linux (RHEL/CentOS-style) and AWS workloads** (EC2, Lambda, S3, Route 53), applying least-privilege IAM, patching, and monitoring; built Tableau dashboards for security metrics.

Graduate Course Assistant | New York University

Aug 2025 – Present

- **Teach offensive security and software supply chain security labs** and mentor graduate students on CI/CD pipeline risk and vulnerability triage.

DevOps & Security Intern | Hygia Health Services

Apr 2025 – Sep 2025

- **Supported DevSecOps practices and application security reviews** for a healthcare technology environment.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript/TypeScript (Node.js), SQL, Bash

Backend & APIs: Spring Boot (reactive), Node.js/Express, REST API design, PostgreSQL, JWT/OAuth 2.0

AWS & Cloud: EC2, Lambda, S3, Route 53, IAM least-privilege, Linux administration, Docker, Kubernetes

CI/CD & Automation: GitHub Actions, Jenkins, security-gated pipelines (SAST/DAST/SCA), Ansible-style configuration automation

Security: Threat detection, vulnerability triage and remediation, MITRE ATT&CK, OWASP Top 10, LLM red-teaming, penetration testing

Certifications: CRTP (Certified Red Team Professional); CPTS (in progress); CRTO (in progress)

PROJECTS & RECOGNITION

- **Industry Project with NYU OSIRIS Lab:** Engineered REST APIs using Java Spring Boot reactive, cutting average API response time from 8s to 1.6s (75% latency reduction); implemented an online payment system.
- **Red Team Penetration Test:** Full-scope assessment mapped to MITRE ATT&CK; delivered a risk-scored remediation report.
- **NYU Academic Achievement Award** (distinguished academic achievement, CGPA 4.0); research published by Springer Nature and presented at the 21st International METAVERSE Conference (SCF 2025), Hong Kong.

EDUCATION

M.S., Cybersecurity (GPA: 4.0/4.0) — New York University, Tandon School of Engineering

Aug 2024 – May 2026

B.E., Computer Science Engineering — PES University, Bengaluru
